

Safeguarding Board
FEMALE GENITAL MUTILATION

Part 2: CHILD/YOUNG ADULT (under 18 years old)

This is to help when considering whether a child is AT RISK of FGM, or whether there are other children in the family for whom a risk assessment may be required.

Indicator	Yes	No	Detail
CONSIDER RISK			
Child's mother has undergone FGM			
Other female family members have had FGM			
Father comes from a community known to practice FGM			
A Family Elder such as Grandmother is very influential within the family and is/will be involved in the care of the girl			
Mother/Family have limited contact with people outside of her family			
Parents have poor access to information about FGM and do not know about the harmful effects of FGM or UK law			
Parents say that they or a relative will be taking the girl abroad for a prolonged period – this may not only be to a country with high prevalence, but this would more likely lead to a concern			
Girl has spoken about a long holiday to her country of origin/another country where the practice is prevalent			
Girl has attended a travel clinic or equivalent for vaccinations/anti-malarials			
FGM is referred to in conversation by the child, family or close friends of the child– the context of the discussion will be important			
Sections missing from the Red book. Consider if the child has received immunisations, do they attend clinics etc			
Girl withdrawn from PHSE lessons or from learning about FGM - School Nurse should have conversation with child			
Girls presents symptoms that could be related to FGM – continue with questions in part 3			
Family not engaging with professionals (health, school, or other)			
Any other safeguarding alert already associated with the family. Always check whether family are already known to social care			

ACTION

Ask more questions – if one indicator leads to a potential area of concern, continue the discussion in this area.

Consider risk – if one or more indicators are identified, you need to consider what action to take. If unsure whether the level of risk requires referral at this point, discuss with your named safeguarding lead.

Significant or Immediate risk – if you identify one or more serious or immediate risk, or the other risks are, by your judgement, sufficient to be considered serious, you should look to refer to CRT / JRT in accordance with Safeguarding procedures.

If the risk of harm is imminent, emergency measures may be required and any action taken must reflect the required urgency.

In all cases:–

- Share information of any identified risk the Named GP / Safeguarding Lead
- Document in notes
- Discuss the health complications of FGM and the law in the UK

Safeguarding Board
FEMALE GENITAL MUTILATION

Indicator	Yes	No	Details
SIGNIFICANT OR IMMEDIATE RISK			
A child or sibling asks for help			
A parent or family member expresses concern that FGM may be carried out on the child			
Girl has confided in another that she is to have a 'special procedure' or to attend a 'special occasion'. Girl has talked about going away 'to become a woman' or 'to become like my mum and sister'			
Girl has a sister or other female child relative who has already undergone FGM			
Family/child are already known to social services – if known, and you have identified FGM within a family, you must share this information with Central Referral Team			

Please remember: any child under 18 who has undergone FGM should be referred to social services.
